# MARINE CARGO INSURANCE

---

As your logistics provider, we want to ensure you receive the best possible service in all aspects of the movement of your freight. An integral component of our services is to make sure you are aware of the need to properly insure your cargo during transit and to provide you with a competitive and comprehensive insurance program.

While we always handle your goods with the utmost care, there are problems inherent in the transportation process that may cause losses beyond our control. For example:

- Lloyds of London recently reported that on average, one ship sinks every day.
- Because of regulatory changes in the industry, transportation as we know it is not the same. Carrier's liability is changing and these new treaties will have to be upheld in the court system. Do you want to be among the first to prove liability under these new regulations?
- Some goods are simply prone to loss simply by their nature. Make sure to protect your financial interest.

### COMPREHENSIVE COVERAGE

In order to protect your financial interest in your goods, you should insure them all-risk. This is the broadest form of insurance coverage and is available through our company. It basically insures against all-risks of physical loss or damage from any external cause. Another way to think of all-risk insurance is that everything is covered, EXCEPT what is specifically excluded. Please take a look at the chart on the reverse side of this page which compares risks under All-Risk vs. FPA coverage.

Can you say your goods are protected so comprehensively right now? Do you know if your goods are protected at all? Sometimes in the transportation process, the other party in the transaction says they have insured the goods. Do you want to take a chance that their insurance might be less comprehensive than you could buy on your own?

### BENEFITS OF INSURING

Should something unforeseen happen to your cargo while in-transit, we want you to have the best protection available to help you recover after the loss. Because of our mass buying power and our strong relationship with our insurance broker, we can provide you with coverage and services not available elsewhere.

Should a loss occur, we are in the best position to help coordinate a claim. The insurance company must receive certain documents in a very timely manner in order to process a cargo insurance claim. We can facilitate that process for you so that you are able to focus on your business. Our experienced insurance broker will act immediately on your claim and handle them quickly and professionally. Minimal effort is required on your part.

Finally, we believe cargo insurance is an integral part of the transportation process. As your transportation service provider, we have negotiated special rates with our insurance carrier based on our company's volume. Additionally, we can access special insurance markets (like Lloyds of London) when a risky, or high value, commodity is involved.

Let us make sure your cargo is protected. For more information on our cargo insurance program, please complete the following Cargo Insurance Request Form and return it to our office for a no-obligation quotation. We encourage you to take advantage of our cargo insurance program and make sure your goods are protected against the perils of transit.
